

BUTTERFLY VALVE / 3650

LUG-DUCTILE DISC

PN 16
DN 40 → DN 300

PRODUCTION STANDARDS

DESIGN	TS EN 593
END CONNECTION	FLANGED TS EN 1092-2 / ISO 7005-2
FACE TO FACE	TS EN 558 Seri 20 ISO 5752 Seri 20
TEST	TS EN 12266-1
MARKING	TS EN 19

FEATURES

- FAF 3650 lug type butterfly valve with ductile iron disc is installed in upright axis to the pipeline, quarter turn (90 degree) operating disc, maintains %100 tight sealing in either direction through the sleeve robed into inner walls of the valve body
- Can be used for the purpose of open/close and proportional flow control
- Can be installed with single flange, can be used as a pipeline end valve
- Equipped with ductile iron disc and can be used in various flow types and different applications with the EPDM, NBR and VITON sleeve options
- Compared to other valve types, with its small dimensions offers the advantages of lightweight, easy installation and cost effectiveness
- Head loss is at minimum level through the double shaft design of FAF Valve
- The inner and outer surfaces of valve body is coated with electrostatic fusion bonded epoxy(FBE) / oven backed powder epoxy coating. Smooth operation and longer life is maintained in very tough conditions
- Electrical or Pneumatic actuators directly fit on valve top flange. No need for any additional intermediary parts.

APPLICATIONS

Hot Water, Cold Water, Steam, Waste Water, Distribution Lines, Water Treatment, HVAC, Textile, Chemicals, Food Industry, Oil&Gas

TEMPERATURE

- +130 °C (EPDM)
- +100 °C (NBR)
- +220 °C (VITON)

TECHNICAL DRAWING

MATERIAL SELECTION

BODY	EN-GJL-250 CAST IRON (GG25) EN-GJS-400 DUCTILE IRON (GGG40)
DISC	EN-GJS-400 DUCTILE IRON (GGG40) + NICKEL COATING
STEM	1.4021 - AISI 420 STAINLESS STEEL
SEALING	EPDM NBR VITON
COATING	ELECTROSTATIC POWDER EPOXY
